

COVID-19 TOOLS & RESOURCES

The COVID-19 pandemic has brought new urgency to America's affordable housing and eviction crises. Even before its onset, millions struggled to make rent and were vulnerable to eviction. Now—at a time when stable shelter is most critical—unemployment and economic hardship have spiked to unprecedented levels, and the need to provide support and data to inform policy solutions is greater than ever.

The Eviction Lab has responded by creating several new tools: The Eviction Tracking System, which provides weekly

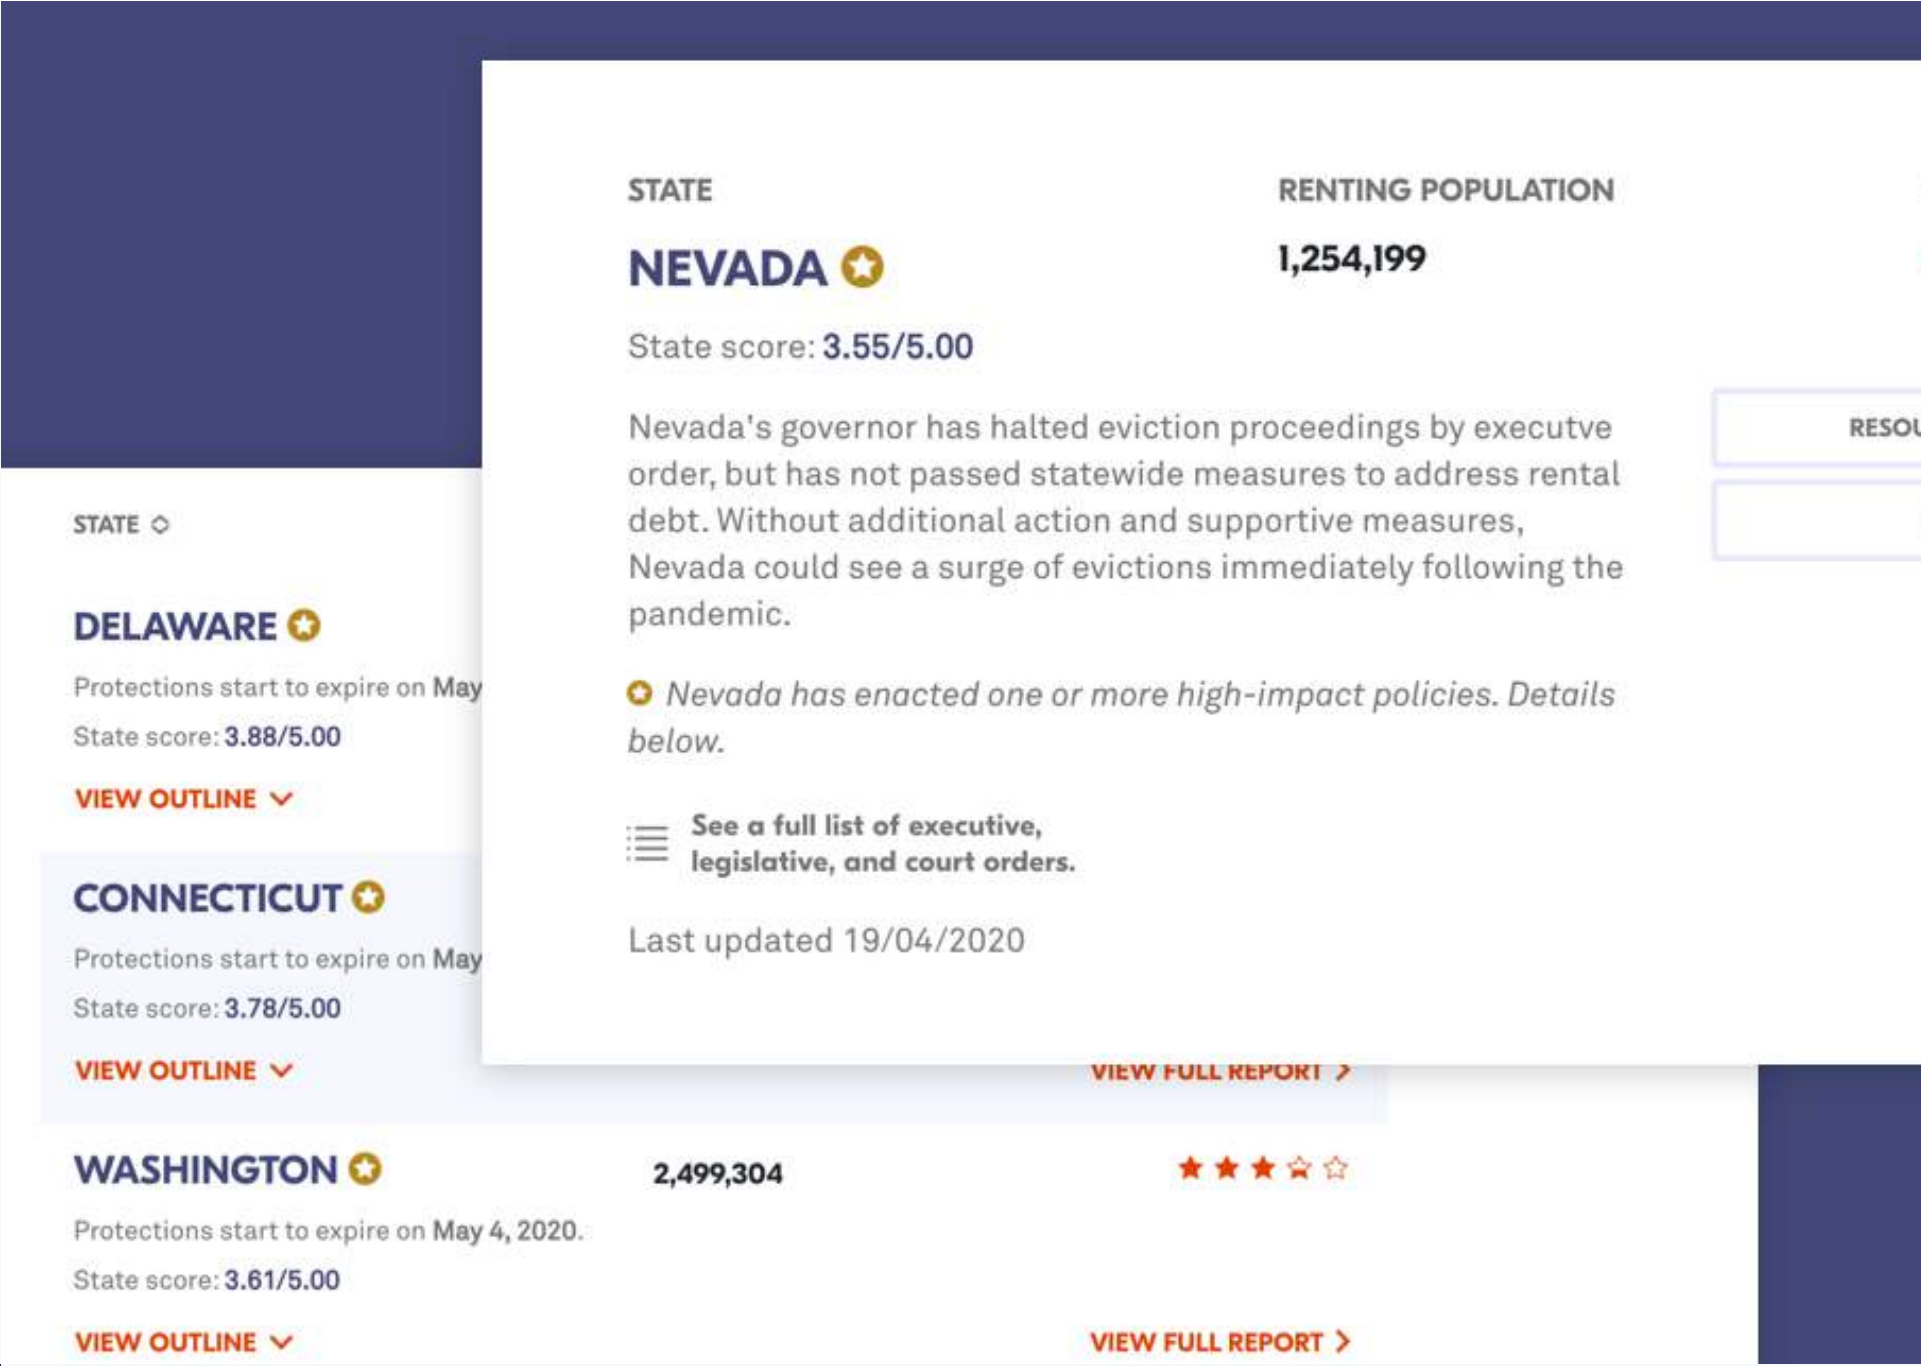

updates on eviction filings in a number of American cities; The COVID-19 Housing Policy Scorecard, which compiles and rates state-level protections during the pandemic; and a regularly-updated list of emergency policies across all levels of government. Lastly, for those who need direct help, our site Just Shelter offers a database of resources in all 50 states that provide housing assistance, legal aid, and more.

See below to explore our tools and resources.
